- Sketch
- Photoshop

Work Experience

Splunk Inc
Software Engineer, Front-End Lead

OCTOBER 2019 - APRIL 2023

Lead UI development for a fully remote team that developed & maintained a suite of highly complex tools & data visualizations. Created performant, testable, scalable React components. Collaborated with product managers & designers to create new features and enhancements of existing tools. Created a React Component Library and a Figma UI Design Library. Served as a front-end leader & mentor to other members of the team. Created internal standards for frontend code style and quality. Architected & managed front-end feature work.

ServiceNow
Senior Front-End Developer (Contractor)

OCTOBER 2018 - OCTOBER 2019

Refactored the existing CSS code base (approximately 115 files). Created & implemented style guidelines & standards. Created fully functional standalone React components to be implemented into AEM for use by authors & publishers. Collaborated with designers & project managers to understand concepts & requirements and made suggestions for best-practices & timeboxing.

Special Tactics Solutions
Senior Front-End Engineer (Contractor)

MARCH 2018 - OCTOBER 2018

Worked on a team of three to create a React site for covert government operations. Involved in the project from conception to fruition, including design decisions, architecture of the site, choice of front-end technologies, and development across the entire stack, which included Next.js, Redux, Express, MongoDB, Node, and SASS.

Salesforce (and Sequence)
Senior Front-End Developer

AUGUST 2016 - MARCH 2018

Worked as part of large cross-functional remote teams on projects for companies such as Earthbound Farms, Chipotle, Caesar's, and University of Texas. Developed performant, responsive sites, oftentimes within very tight time-frames. Front-end data visualization work for a data management platform the Salesforce had just acquired. Sequence was a digital agency acquired by Salesforce in February 2017.

AKQA
Creative Developer

DECEMBER 2015 - AUGUST 2016

Worked embedded on client accounts such as Apple and Audi. These accounts required incomparable attention to detail, multi-browser & multi-platform compatibility, and the ability to work under tight deadlines and high pressure. Created a parallax microsite for an AKQA nvidia award submission. Worked closely with project managers and designers to ensure all requirements were well-understood and implemented.

Michelle Lamoureaux, Senior Front-End Developer

Soft Skills

- Leadership & mentoring
- Pixel-perfect attention to detail
- Extremely organized
- Passionate about front-end work & teaching it to others
- Strong collaboration & communication skills across functions, teams, and locations
- Strong desire to always to be learning
- Proactively identifies areas of improvement & inefficiency and suggests solutions
- Excellent trouble-shooting, analytical, and problem-solving skills

Work Experience

Huge, Inc.

DECEMBER 2013 - DECEMBER 2015

Front-End Engineer

Worked on a multitude of projects for clients such as Seat, Chase Bank, NYU Langone, Comcast, and more. Worked both independently as well as part of a large team. Agile development and continuous delivery were core to all projects. Worked closely with Visual & UX Designers, Project Managers, Business Analysts, Backend Developers, Editors, Copywriters, and QA teams. Created & led one of the technical guilds and wrote several articles for the Huge blog on various front-end topics.

Showtime Networks

OCTOBER 2012 - DECEMBER 2013

Senior Front-End Developer

Lead front-end development for the Showtime website. Developed microsites for new series/shows as well as one-off digital marketing campaigns. Debugged issues & errors within the existing codebase. Worked directly with marketers, designers, and back-end Java developers. Involved with digital marketing brainstorming.

Atlantic Records

OCTOBER 2010 - OCTOBER 2012

Senior Developer

Handled all web development for the digital marketing team. Created marketing initiatives, full websites, social apps, web stores, and more for artists including Ed Sheeran, Bruno Mars, Trey Songz, and Wiz Khalifa. Worked extensively with social APIs, created proofs of concept, built out prototypes, and managed the web server, artist email accounts, and over 100 domains.
